

FDB Multilex[®]

MULTILEX IN THE CLOUD

fdb[®]
First Databank

Safer prescribing delivered with speed, resilience and scalability

- Faster deployment
- Seamless data updates
- Secure & compliant

NEW!

Multilex in the Cloud provides a smarter, faster and more cost-effective way to access up-to-date clinical decision support.

Supporting the shared ambitions across UK health systems for digital innovation and efficiency, Multilex in the Cloud supports digital transformation and interoperability, while reducing the burden of hosting, updates and maintenance.

Seamless, automatic updates ensure continuous access to the latest Multilex developments, while **enterprise-grade security** and **flexible scalability** deliver significant savings in both time and cost.

FDB Multilex® is the UK's leading drug database and e-prescribing decision support solution and is used in over 10,000 sites.

With over 40 years' experience, FDB has built long-standing partnerships with the leading clinical system vendors. Multilex integrates into existing workflow and is used at the point of care as a trusted e-prescribing decision support tool.

Integrating the Multilex drug database with an electronic patient record (EPR) enables context-specific drug knowledge and enhanced functionality that helps to reduce prescribing errors.

Benefits for everyone

NHS organisations, healthcare providers & clinical end users

Confidence at the point of care. No friction. No compromise.

Gives clinicians instant access to the latest medicines knowledge – securely, reliably, and at scale.

Always-current medicines intelligence

Continuously updated, clinically-validated data supports safer prescribing and reduces clinical risk.

Fast, dependable performance

Cloud delivery ensures consistent, high-speed access across NHS sites – when it matters most.

Scales effortlessly

Expand across trusts and care settings without infrastructure upgrades or disruption.

NHS-ready security & compliance

Designed to meet NHS and data protection standards, with encryption in transit and at rest.

Seamless updates

Automatic updates deliver new features, improvements and content seamlessly.

Actionable usage insights

Understand local adoption and usage to support governance, optimisation and value realisation.

Clinical system suppliers

Cloud-native by design

Built for seamless integration with NHS systems and supplier platforms.

Always up-to-date

Automatic updates ensure continuous compliance with the latest guidance and standards.

Elastic scalability

Supports customer growth effortlessly – no infrastructure constraints.

Lower total cost of ownership

Hosting, security, monitoring, and resilience fully managed by FDB.

Enterprise-grade reliability

Powered by Microsoft Azure for proven availability, security, and compliance.

Faster time to value

Rapid provisioning enables quicker go-lives and smoother customer onboarding.

Deployment & performance insights

Analytics supports optimisation, customer success, and long-term value.

Ready to adopt Multilex in the Cloud?

Customers are increasingly choosing to integrate Multilex in the Cloud within their solutions, with positive results. Our established presence within the healthcare sphere and modernisation of our flagship Multilex solution means we can help you safely and reliably migrate to the cloud.
