
Multilex Bulletin – February 2021

The Multilex Bulletin is an indication of notable changes made to the Multilex database. It also provides general information and advance warnings of changes for future months. Changes to product name are expressed in the form of the Multilex Preferred Display Name. Customers using other naming conventions may not see the changes as listed. Visibility of changes is dependent on the current data being loaded into your system and the specified element being available via your interface.

This document is not a list of all changes to the Multilex database.

The Multilex Bulletin is also available at www.fdbhealth.co.uk

Other Changes

COVID-19 vaccine update

During January 2021 the product record for "COVID-19 vaccine solution for injection multidose vial (ASTRAZENECA UK LTD)" was updated to:
"COVID-19 VACCINE ASTRAZENECA (CHADOX1 S (RECOMBINANT)) solution for injection multidose vial." The record is now further aligned with Dictionary of Medicines and Devices (dm+d).

FDB is continuing to work closely with NHS Digital to ensure timely updates to the Multilex data with respect to COVID-19 vaccine developments.

Diafer injection solution

In line with the international non-proprietary name (INN) and the SPC for Diafer solution for injection, the Multilex generic - Iron isomaltose 1000 100mg/2ml injection solution now reads:
Ferric derisomaltose 100mg/2ml injection solution

Monofer injection solution

In line with the INN and the SPC for Monofer solution for injection, the Multilex generic - Iron isomaltose 1000 100mg/ml injection solution now reads:
Ferric derisomaltose 100mg/ml injection solution
