
Multilex Bulletin – January 2021

The Multilex Bulletin is an indication of notable changes made to the Multilex database. It also provides general information and advance warnings of changes for future months. Changes to product name are expressed in the form of the Multilex Preferred Display Name. Customers using other naming conventions may not see the changes as listed. Visibility of changes is dependent on the current data being loaded into your system and the specified element being available via your interface.

This document is not a list of all changes to the Multilex database.

The Multilex Bulletin is also available at www.fdbhealth.co.uk

URlbag pocket sized urinal system 1.1 litres now reads:
URlbag pocket sized urinal system 1.2 litres URlbag

Other Changes

COVID-19 vaccine update

During December 2020 the product record for "TALENT 0.5ml dose solution for injection multidose vial (SECRETARY OF STATE FOR HEALTH)" was updated to read "COVID-19 vaccine solution for injection multidose vial (ASTRAZENECA UK LTD)".

This will make identification of this product easier on Multilex picklists. The record will be further aligned with dm+d once that information is available. It is anticipated that this be available to dm+d picklist users after loading the January data.

FDB is continuing to work closely with NHS Digital to ensure timely updates to the Multilex data with respect to COVID-19 vaccine developments.
